Complete Software User Manual (Detailed)

An in-depth technical documentation for system administrators and accountants.

1. Security, Login & Settings

The foundation of your ERP begins with secure access and proper company configuration.

- **Login Security:** Access the system using the master password (Default: admin123). Use 'Forgot Password' for OTP-based recovery via your registered Gmail.
- **Company Identity:** In the 'Settings' tab, enter your legal name, GSTIN, PAN, and full address.
- **App Passwords:** For automated email/OTP features, use a 16-digit Google App Password.
- **Data Management:** The 'Backup Database' button allows you to export a complete snapshot of your SQLite database.

2. Client & Contract Management

Set up parties and their specific tax behaviors to automate future billing.

- **Dynamic Contracts:** Add multiple contracts for a single client. Define Start Date and End date.
- **Principal Logic:** Configure how many taxable amounts (Principal) are allowed per bill.
- **Tax Customization:** Pre-set HSN codes and GST rates for each client.
- **Automated Deductions:** Set standard deductions like Security Deductions or TDS.

3. Precision Billing Engine (Invoicing)

Generate professional compliance-ready invoices in seconds.

- **Intelligent Fetching:** Selecting a client automatically loads their HSN codes, GST rates, and deduction rules.
- **The Calculation Matrix:** Computes CGST, SGST, IGST and Income Tax.
- **Period Tracking:** Define billing period which reflects in automated ledger.

- Dual-Entry Automation: Generates Sales Voucher and updates accounting books.

4. Full-Scale Accounting & Financials

Professional-grade reporting for management and CA compliance.

- Voucher Entry System: Record Payments, Receipts, Journal entries.
- Trial Balance: Real-time ledger balances.
- Profit & Loss: Comprehensive view of income and expenses.
- Balance Sheet: Shows Equity, Liabilities, and Assets.
- GST Reports: Generate data-filtered HSN-wise summaries.
